

Active RFID Security Pedestals Crystal Clear

superior performance - luxury crystal clear design

S A Secure Crystal Clear Active RFID security pedestals provide the ultimate in detection performance and robust yet elegant aesthetics. Our purpose designed Active RFID technology delivers that much sought after combination of outstanding detection reliability and anti-body-screening performance, with a usefully compact and space saving detection zone. Sculpted from solid polished plexi-glass, the slim, stylish Crystal Clear system provides outstanding RFID tag detection with an extra-wide pedestal spacing option. This important performance advantage is a key benefit in providing the maximum open access at library entrances. A distinct yet discrete statement of luxury, these elegant crystal clear pedestals are mounted on a neat impact resistant matt black foot, ensuring a trouble-free life of impeccable service in the most demanding of environments. With advanced control systems technology developed on the basis of extensive international client experience, our security pedestals set the standard in detection, reliability and modularity. From a simple single-door exit, to a seven metre wide mall-style walkway, the Crystal Clear provides complete flexibility to meet your needs. Providing universal data compatibility and interoperability with current and future standards, our luxury security pedestals provide total assurance on compatibility with future RFID developments
